EDUCATION

- **Carnegie Mellon University** Pittsburgh, PA
M.S. Electrical & Computer Engineering / ETIM Dual Degree *Expected May 2028*
- **National Taiwan University** Taipei, Taiwan
B.S. Electrical Engineering; GPA: 4.16/4.3 *Jan 2026*
 - **Relevant Coursework:** Data Structures, Algorithms, Electronic Design Automation, SoC Verification, Machine Learning

SKILLS

- **Languages:** Python, JavaScript/TypeScript, C++, Verilog, MATLAB
- **Frameworks/Tools:** React/Next.js, Node.js, Pandas, PyTorch, Git
- **Specialties:** Full-stack development, system design, algorithm design, formal verification

EXPERIENCE

- **SLEKMED** Taipei, Taiwan
Product Developer *Aug 2023 – Mar 2026*
 - **Note-to-Video Generator:** Developed a web-based note-to-video generator pipeline using Marp, OpenAI API, and FFmpeg, enabling medical experts to create educational videos from their notes.
 - **Medical Simulation Platform:** Built a web-based medical diagnosis and simulation platform using Next.js in collaboration with medical students; secured funding from the Ministry of Education.
 - **Virtual Patient Chatbot:** Implemented an LLM-based chatbot as a virtual patient, contributing to a 1st-place finish among 40+ teams in the 2024 CTCI AI Competition (400K NTD prize).
- **Synality** Taipei, Taiwan
Co-founder / CEO *Dec 2024 – Feb 2025*
 - **Startup Development:** Built and launched a Next.js matchmaking MVP within 10 days, leading a team of 3 co-founders through 3 rounds of user testing and cohort analysis.

PROJECTS

- **Whiskers IDE:** Built a web-based compiler and IDE with a Scratch-inspired text syntax, using a drag-and-drop interface to bridge block-based and JavaScript programming for beginner coders.
- **Urban Radius:** Designed an original city-boundary determination algorithm inspired by the h-index; built a Next.js simulation interface operating on worldwide population data.
- **NTU Pair:** Built a full-stack matchmaking platform reaching 1,600+ verified users; re-architected the system with secure coding practices after mitigating XSS, DoS, and credential-stuffing attacks.
- **Virtual Makerspace:** Led a 25-member team to build a React/Node.js inventory and reservation system replicating a physical university makerspace, shipping equipment tracking and usage-training features.

AWARDS

- **1st Place, Silicon Motion Award, MakeNTU 2025:** Built a CV-based robotic cockroach catcher; designed a custom reverse-proxy enabling phone-camera-to-Raspberry-Pi communication.
- **Best Maker Award, MakeNTU 2024:** Developed an AR helmet navigation assistant with a multi-threaded async architecture inspired by hardware flip-flop synchronization design.

LEADERSHIP

- **Founder and President, NTU Learning Optimization Club:** Researched learning methodologies, delivered 8 nationwide speeches, and provided consultations helping 200+ students improve their study habits.
- **Lecturer, NTUEE Student Association Academic Dept.:** Organized 25 academic workshops and taught technical subjects to electrical engineering undergraduates.
